

GREENEWAY™ Textile Ink Cleaner

Made from soybeans • 100% Biodegradable • Non-Toxic and Non-Caustic

One of the most environmentally safe cleaners for plastisol and water-based inks. GREENEWAY™ is a biodegradable, non-hazardous screen cleaner ideal for replacing mineral spirits. GREENEWAY™ can be diluted up to 50% with water, making it one of the most economical and powerful cleaners available today! Ideal for recirculation systems.

To Use:

- 1. Remove excess ink from screen and spray a small amount on both sides of the screen.**
- 2. Work in with nylon brush or Franmar's White Biggee Pad.**
- 3. Wipe both sides with damp shop towel or rinse clean with water.**
- 4. Use dry cloth to wipe dry. Screen is now ready to re-tape and re-ink.**

GREENEWAY™ does not evaporate, a water rinse or cleaning with a damp shop towel is necessary to remove the oil residue.

- ✓ **Tip #1** Remember, less is better. Use small amount and you will immediately see the ink loosen.
- ✓ **Tip #2** If screen feels oily after cleaning, use less GREENEWAY™ or use more water to rinse.
- ✓ **Tip #3** For UV and air dry inks, use full strength.
- ✓ **Tip #4** Ideal for recirculation systems.
- ✓ **Tip #5** GREENEWAY™ can be used for on-press color changes and as a screen opener.
